

ITB – Information Technology Services

Addendum 1

1. Can you please provide the incumbent vendors previous bid documents?
- Please see attachment “Exhibit A” of Addendum 1.
2. What is the annual spend for this contract?
- Annual spend for the contract will be determined by the bid amount from vendors and award of the RFP; there is no set limit from BRAA.
3. If it is an ongoing project, Is the existing contract with one or multiple Vendors?
- Current contract was awarded to one vendor for one fiscal year.
4. Who are the existing vendors?
- Simplify
5. Is budget allocated for this project?
- BRAA has a specific IT budget but is adjustable depending upon award of the contract.
6. Please provide a copy of the proposal of all current vendors providing services, including rate/cost sheets.
- Please see attachment “Exhibit A” of Addendum 1.
7. How many vendors do you intend to award?
- One vendor will be granted the RFP contract.
8. What is the expected/tentative award date for this project?
- A specific date has not yet been set, however, we intend the projected start date of the contract to coincide with the expiration of the current contract, which is April 1st, 2020.

9. Can we utilize sub-contractor's past performance to bid on this project?

-Sub-contractor's will not be awarded the contract from BRAA, only the vendor that proposed an accepted bid. Sub-contractors are on an "as needed" basis for projects generally outside the normal scope of services.

10. How do we go about items outside the proposal?

- Services needed outside the normal scope of services should be proposed following the rubric within the bid documents.

11. Who is responsible for any new hardware if needed for any of the products offerings?

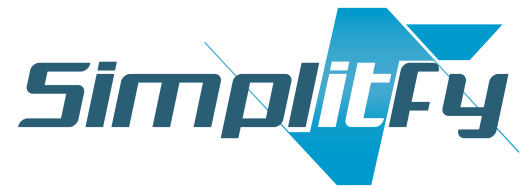

- Hardware procurement is generally handled by BRAA staff inhouse as needed and taken into consideration by the current IT provider. Products may be purchased from the IT vendor upon award, if necessary, and will be billed separately from the quoted monthly rate.

12. Do we need to add any backup for workstations as part of the proposal?

-At this time, BRAA does not require individual backs for end-user workstations, however, that service may be offered as an "optional service" to a vendor's bid document.
