

RFP 2025-BRAA-01
IT Services
Addendum #1

1. Who is currently providing services?

Simplifly

2. Are there any existing solutions or vendors you're currently to support your IT? If so why are you seeking a change.

The contract with the current vendor, Simplifly is expiring.

3. What is the allocated budget for this project?

Current costs average \$3,203.06 per month.

4. What is the current cost?

\$3203.06 per month on average.

5. Regarding items 7 and 9: For the Temp Server and BRD Server, are these servers you already have and simply need us to set up, or do you require us to supply these servers as part of the bid proposal? If we are to supply the servers, are you looking for a temporary solution that we provide until a new server is purchased and set up, after which we would retrieve the temporary unit? Alternatively, would you prefer a permanent solution where we supply the server for purchase when the time comes?

The Authority currently has a spare server on site that serves as a back up in case one of the primary servers has a catastrophic failure. This server would be backed up from the BDR solution. The current BDR solution is leased from the current provider.
