

RFP 2026-BRAA-02
Enterprise Resource Planning (ERP) Accounting Software
and Implementation Services
Addendum #2

As part of the Interview and Final Ranking, do you anticipate a demonstration of the proposed solution?

While it is not a requirement to see a demonstration, it would be highly beneficial to see the product prior to scoring.

Section 5.1 requires the proposer to have been "in the business of providing ERP accounting software solutions and/or implementation of services for government entities" for a minimum of 5 years. This appears to be a mandatory minimum qualification, not a scored criterion. The BRAA will review this before scoring even begins (Section 7.2). If our recommended implementation partner cannot affirmatively satisfy this requirement, will the proposal be deemed non-responsive and rejected outright before evaluation?

Yes, all requirements of the RFP will be reviewed prior to scoring to ensure responsiveness. If the minimum qualifications are not met, the bid will be deemed non-responsive and it will not move onto the next phase.
