BOCA RATON AIRPORT SUSTAINABILITY MANAGEMENT PLAN (SMP) UPDATE

✓ PROJECT COMPLETED

Contractor: Ricondo and Associates

Goal: Identify and analyze key sustainability categories, set measurable goals, and outline initiatives to integrate sustainability into overall airport development.

Start Date: Spring 2024

Completion Date: Winter 2025

Project Funded By: Florida Department of Transportation

Grant Amount: \$280,000

Grant Award Date: November 2023

Project Cost: \$350,000

ABOUT THE PROJECT

The Sustainability Management Plan (SMP) was developed using five years of the Airport's operational data, input from the Sustainability Advisory Partners* and the Boca Raton Airport Authority (BRAA) Board. The plan provides the BRAA with a data management tool to track performance and emissions, along with a technical report and outreach materials to support implementation and communicate the Airport's long-term sustainability commitments. Benefits of this program include:

Energy Efficiency & Cost Savings

Waste Reduction & Recycling

Water Conservation & Resiliency

Community & Stakeholder Engagement

Operational Resiliency

Financial Resiliency

* **The Sustainability Advisory Partners (SAP)** A group of Airport stakeholders that includes Airport tenants, local utilities, educational institutions, nonprofits, and public agencies who provide guidance on the Airport's sustainability goals and initiatives.
