BOCA RATON AIRPORT OBSERVATION AREA

Concept Designer: Hauber Design Associates

Construction: Recreational Design & Construction

Goal: Provide an exceptional educational experience for guests to learn about the Boca Raton Airport and inspire the next generation of aviation professional and enthusiasts.

Start Date: July 9th, 2024

Completion Date: January 28th, 2025

AMENITIES

Circular Design

provides a 360-degree, unobstructed viewing experience.

Weather-resistant

provides protection from the elements, such as sun and rain, ensuring comfort for visitors regardless of weather conditions.

Accessible ramps

ensures that the observation area is inclusive for all visitors.

Educational signage

enhances the educational value by making it a learning opportunity for visitors.

Comfortable seating

allows visitors to relax and comfortably enjoy the airport activity.

Live air traffic control tower radio

allows visitors to listen in on communications between pilots and air traffic controllers in real-time.
